

## "What our Schools say"

- The Consortium definitely has a real approachable face!
- Excellent training and support for school-based tutors and their trainees
- Leadership staff – helpful, understanding, supportive, professional and dedicated
- Very thorough training programme that covers all aspects of school life – not just teaching
- Having an almost entirely school-based teacher training route that provides trainees with the opportunity to experience a whole school year with the consistency of staff/pupils is excellent
- The core taught material has been useful in our school's professional development
- Seeing a trainee grow and develop. A great satisfaction knowing that you have had an influence in that professional development
- It has made me consider my teaching and learning and given me time to reflect on my own practice
- Excellent from start to finish
- This has been a fantastic stepping stone in my career. I have enjoyed every minute of my role as a LSBT
- This is a well-managed programme in which trainees get the most valuable learning opportunities and support
- A rewarding and professionally developing experience
- Outstanding course
- The trainee is able to experience all aspects of teaching which they might not during a PGCE course
- Found the process of being subject mentor very beneficial and rewarding, allowed me to reflect upon my own teaching practices
- Excellent opportunity for the department's professional development as well as that of the trainee
- A good practical course which in my opinion has produced a well rounded teacher to enter the profession
- I always find being involved with the GRTP professionally and personally rewarding and I am convinced that my own teaching benefits, as I work with trainees. Trainees have given a good deal to the pupils and to the life of the school in general
