

Health and safety at the site questionnaire

The Inspector will visit the site and will need to know what safety equipment and protective clothing to bring. The following questions indicate the type of information the Inspector will need about the site. Please supply any additional information on a separate sheet of paper.

1. Is the site uneven or does it present any other known risks? Is special footwear or any other Personal Protection Equipment required?

Part of the route crosses a rough grass field so stout boots or shoes are advisable and wellington boots are advisable in wet weather conditions as the path crosses a small beck by means of informal stepping stones which can be submerged at high water levels. Part of the route is inaccessible due to a security fence around a sports pitch but users follow the fencing round the south end of the pitch and the surface here can be muddied by the passage of feet.

2. Is there any likelihood of exposure to pets or other animals which may present a risk to the safety of the Inspector?

No resident animals but route well-used by dog walkers.

3. Is the site remote and/or can it be seen from other highways or rights of way?

Not remote. The route crosses a green space within a residential area. Most of the route is visible either from a road or from a multiuser path, both of which are well used.

4. Does the site have a good mobile phone signal or is there easy access to a public telephone should the emergency services be required?

Good mobile phone signal.

5. Is the right of way easily accessible? Will arrangements for access by the Inspector need to be made in advance?

Easily accessible and in regular use with the exception of the section across the sports pitch. This section can be seen clearly through the fence from either side of this section. On street parking is available at either end of the route but western end is recommended, especially during term-time.

6. Are there any dangerous pieces of equipment or substances stored at any point along the right of way?

No

7. If there is any other relevant information which the Inspector should be aware of that is not covered in this questionnaire?

No
