

Overweight and obesity in Lancashire schools 2007-08 to 2009-10

This summary analysis has been completed as part of the wider Lancashire needs assessment for childhood obesity in Lancashire. It looks at schools in Lancashire 14 where prevalence of overweight and obesity is significantly higher or lower than the England average in statistical terms.

Data from the National Child Measurement Programme (NCMP) 2007-08, 2008-09 and 2009-10 have been pooled together to narrow the confidence intervals, making the data more robust. This list therefore highlights only the schools where there have been statistically significant differences in the prevalence of overweight, obesity or overweight and obese combined compared to the England average between 2007-08 and 2009-10.

Due to the sensitive nature of this report, we request that it is kept confidential and not published in any form.

District/LA	School URN	School Name	Reception			Year six		
			Overweight	Obesity	OW & OB combined	Overweight	Obesity	OW & OB combined
