

# COSY CARPETS

## Introduction

This task is based on fitting different widths of carpet into a given room. It deals with practical aspects such as the measurements that would be needed in order to buy a carpet, the widths that carpets are made in and the different ways that carpets can fit a room when joins are needed. Subsequent work looks at the best design where there is a choice of carpet widths and whether features such as fitted cupboards affect the amount of carpet required.

The task could be introduced by looking at advertisements for carpets (and looking at the small print) or else considering how the classroom might be carpeted.

# Pre-release data sheet

## COSY CARPETS

A superb range of carpets to enhance your home

Wide range of fashionable colours,  
all with stain resistant finish

Top quality wool mixture carpets in four widths

	<i>Plain</i>	<i>Berber</i>	<i>Light Pattern</i>
<b>2-metres wide</b>	£17.99 per metre length	£19.95 per metre length	£21.99 per metre length
<b>3-metres wide</b>	£25.49 per metre length	£27.79 per metre length	£29.99 per metre length
<b>4-metres wide</b>	£32.99 per metre length	£34.99 per metre length	£36.49 per metre length
<b>5-metres wide</b>	£38.99 per metre length	not available	£44.99 per metre length

Extend the life of your new carpet with our  
keenly priced underlay

### Firmapad Underlay

<b>Light or medium use</b>	£3.95 per square metre
<b>Heavy domestic use</b>	£4.95 per square metre

Light use = bedroom, study  
Medium use = dining room  
Heavy domestic use = hall, stairs, living room

We offer easy terms on all fitted carpets  
– only 5% down and up to 3 years to pay the balance –

## Data Sheet Practice

## Questions

Students will need to use the data sheet for Cosy Carpets to answer these questions.

**e**

- 1** Pete's bedroom is 3 metres wide and 2.5 metres long.

He wants to fit a plain carpet in the bedroom.

- a** What is the cost of 1 metre of 3-metre wide plain carpet?
- b** How much will it cost Pete to buy the carpet for the bedroom?
- c** Find the cost of underlay for Pete's bedroom.

## Answers

£25.49

£63.72

£29.62

- 2** Mr Beckham buys fitted carpets for the hall, stairs and landing of his new house.

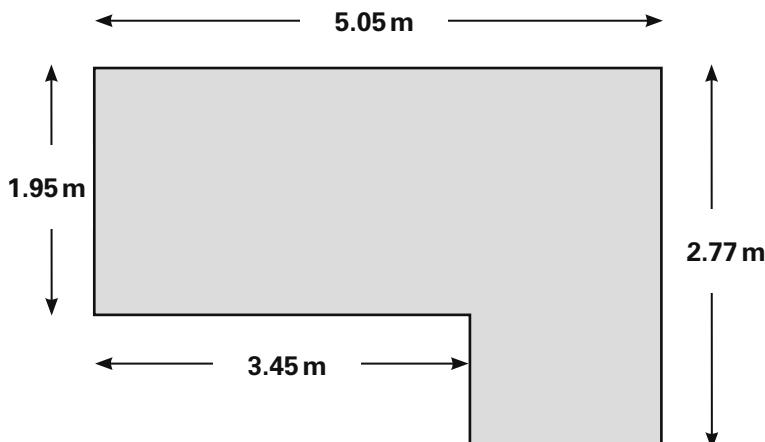

The bill is £985.17

He pays 5% deposit, followed by 24 monthly payments of £58.95

How much extra does he pay?

£478.88

- 3** This is the floor plan of Melissa's hall.

- a** Which width of carpet would be most suitable for this hall?  
(You should assume that Melissa does not want any joins in the carpet)
- b** Find the cost of carpeting the hall with patterned carpet.
- c** Show that approximately 4 square metres of carpet will be wasted.

3-metre

£151.44

$$3.45 \times 0.82 + 5.05 \times 0.23 = 3.99$$

## Data Sheet Questions

- ① Shazia buys Berber carpet for a bedroom that is 3 metres wide and 4 metres long.

(a) What is the cost of 1 metre of 4-metre wide Berber carpet? (1 mark)

- (b) Shazia buys 3 metres of the 4-metre wide Berber carpet.  
Is it cheaper to buy 4 metres of the 3-metre wide Berber carpet?

Show your working. (2 marks)

- (c) Shazia also buys underlay for the bedroom.  
Calculate the cost of the underlay.

(2 marks)

*students need to distinguish between buying a running metre of carpet at so much per metre and a square metre of underlay*

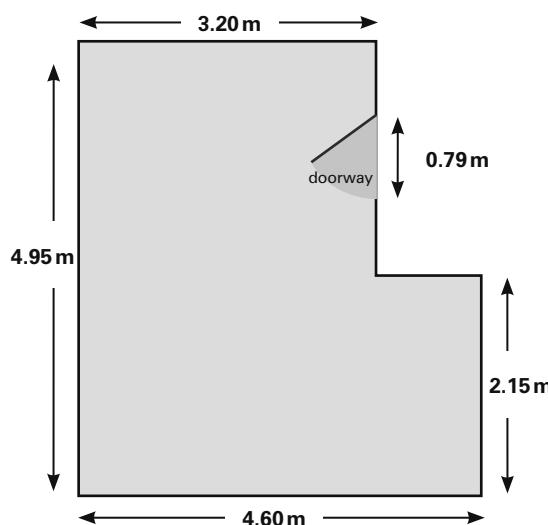

- ② Dan buys fitted carpet and underlay for his flat.

The total price is £587.55

He pays 5% deposit, followed by 36 monthly payments of £21.72

How much does he pay altogether? (3 marks)

- ③ The floor plan of Gary's living room is shown below.

Gary fits patterned carpet in his living room.

He chooses the cheapest way to do this without any joins.

(a) How much does Gary pay for the carpet? (2 marks)

(b) How much carpet is wasted? (3 marks)

- (c) Gary uses Tightgrip rods to fix the edge of the carpet.
- Tightgrip rods are not used at doorways.
  - The doorway is 76 centimetres wide.

How much does Gary pay for Tightgrip rods?

Show your working. (3 marks)

*students have to look at the overall measurements for an irregularly shaped room*

*drawing out the piece of carpet alongside the room plan may help to see where the two rectangles will be removed and wasted*

## Answers and mark scheme

Question	Answers	Marks	Comments
1a	£34.99	D1	
1b	£104.79	M1	or £111.16
	£111.16 and No	A1	£104.79 and No
1c	$12 \times £3.95$	M1	
	£47.40	A1	£47.4 does not earn this mark
2	$587.55 \times \frac{5}{100}$ (= 29.37)	M1	
	$36 \times 21.72$ +their 29.37	M1dep	must have attempted 5%
	£811.29	A1	
3a	5-metre wide $\times$ 4.6	M1	or $44.90 \times 4.6$
	£206.95	A1	
3b	$11.4 \times 2.8$ (= 3.92)	M1	
	$0.05 \times 4.6$ (= 0.23)	M1 ind	
	4.15 m <sup>2</sup>	A1	
3c	$4.95 + 4.60 + 2.15 + 1.40 + 2.80 + 3.20$ (= 19.1) oe	M1	allow one error
	[their 19.1m – 76cm] $\div$ 12	M1	may be seen as 12m not enough but 24m is enough
	£8.50	A1	

## Common Errors

Look out for students who:

- fail to read all the data (for example, the definitions of light, medium and heavy use)
- confuse length (used for different width carpets) and area (used for underlay)
- do not use 2 decimal places when giving a money answer
- correct a bill to 2 decimal places rather than rounding down to the nearest penny

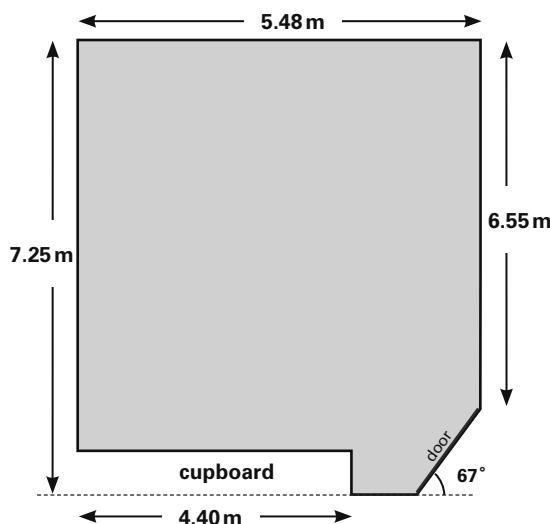

## Extension Questions

- 1 Marco buys carpet and underlay that costs £1 250

He chooses to pay 5% deposit and then £49.70 per month for 3 years.

Work out the percentage increase in the amount that Marco pays compared with the actual cost.

- 2 This is the floor plan of Jan's living room.

- a Jan buys plain carpet for this room.

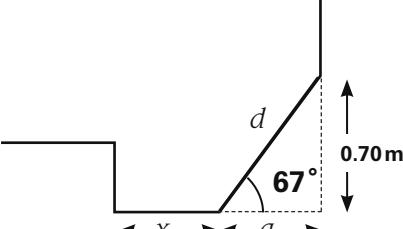

She plans to have one join in the carpet.

Work out the cheapest way that Jan can carpet the room.

- b The door opens back onto the wall beside the cupboard.

Is there enough space to open it right back against the wall?

## Extension Answers

Question	Answers
1	Deposit = £62.50 Payments = £1789.20 Total paid = £1851.70 Increase = £601.70 Increase % = 48% (48.136)
2a	$2 \times 4\text{-metre wide} \times 5.48\text{m}$ costs £361.57 $2 \times 3\text{-metre wide} \times 7.25\text{m}$ costs £369.60 Cheaper to use 4-metre wide carpet
2b	 <p> <math>a = 0.297 \dots</math>  <math>d = 0.760 \dots</math>  <math>x = 5.48 - 4.40 - 0.297 = 0.783</math>  Yes </p>

## Further Development

- ① Carpet prices can be researched on the internet, where many more variations will be found.  
A data sheet could be produced that has prices for carpets made from wool, synthetics, mixtures and so on.
- ② Students could draw room plans for rooms at home, showing overall measurements.  
Rooms that are not simple rectangles are of greatest interest – the cut-offs could be considered as potential rugs or flooring for cupboards rather than just wastage.
- ③ Using their new data, students could write their own exam questions.
- ④ Be an exam writer!  
Encourage students to use the given data sheet to write their own questions for each other.
