£2.5bn

over the last 12 months

National Fraud Intelligence Bureau

JUST 14%

of organisations train staff in cyber security.

Ipsos MORI

ONLY 20%

of organisations have tested their responses

Ipsos MORI

THE CYBER RESILIENCE CENTRE FOR THE NORTH WEST

What are the current threats?

Phishing

Phishing involves criminals sending un-targeted, mass emails to many people asking for sensitive information (such as login details) or encouraging them to visit a fake website.

Ransomware

Ransomware (including Malware) is malicious software that can damage your network, make your systems unusable or encrypt your data until you make a payment to the cyber criminals.

Impersonation

Impersonation can include fraudsters pretending to be your business by hijacking your invoices and contacting your customers in order for them to be paid instead of you.
