THE NATIONAL GRID
TO GIVE A GRID REFERENCE CORRECT TO 100 METRES

EXAMPLE
Middle Red Lamb

EAST	NORTH
Take west edge of kilometre square in which point lies and read the large figures printed opposite this line on north or south margin.	Take south edge of kilometre square in which point lies and read the large figures printed opposite this line on east or west margin.
Estimate tenths Eastwards	Estimate tenths Northwards
84	15
842	159

Full 100 Metre Reference SD 842159

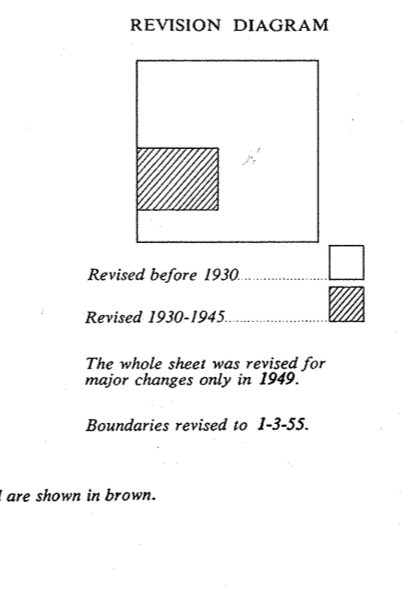

The above Full Reference is unique. For many purposes the first grid letters can be omitted, giving a reference, SD 842159 which recurs at intervals of 500 Kilometres. If both grid letters are omitted, the resulting reference 842159 recurs at intervals of 100 Kilometres. When the area concerned is sufficiently restricted, as will usually be the case with maps on scales of one inch to the mile and larger, both the grid letters are normally omitted.

At the Eastern edge of this sheet True North is 0° 11' East of Grid North and at the Western edge 0° 15' East of Grid North.

Magnetic North was about 10° West of Grid North in 1855 decreasing by about 1° in four years.

Heights are in feet above Mean Sea Level at Newlyn.

Boundaries which have been verified on the ground are shown in black. Boundaries which have not been verified on the ground are shown in brown.
