

Statement of Reasons

Wyresdale Road/Langthwaite Brow SLO

This purpose of this proposal is to extend the length of the restricted road status due to the presence of a system of street lighting and revoke part of an existing Speed Limit Order.

The purpose of the extended 30mph speed limit is to improve the safety for all highway users and increase the sustainability for the development. The subsequent reduction in length of the 40mph section would provide protection and more time for vehicles to navigate the new junction.

These proposals are being funded by the developer of the site under Section 278 of the Highways Act 1980
