**NATIONAL GRID REFERENCE**

The grid lines form part of the National Grid and are at 100 metre intervals. To give a reference defining the position of a point to within 10 metres proceed as follows:-

**EXAMPLE:** P in Pasture Head

EASTING	Take west edge of 100 metre square in which point lies and read the figure opposite this line on the east or west margin	899
NORTHING	Take south edge of 100 metre square in which point lies and read the figure opposite this line on the north or south margin	424
Estimate area of metres from grid line to the point		7
		247
