THE NATIONAL GRID TO GIVE A GRID REFERENCE CORRECT TO 100 METRES

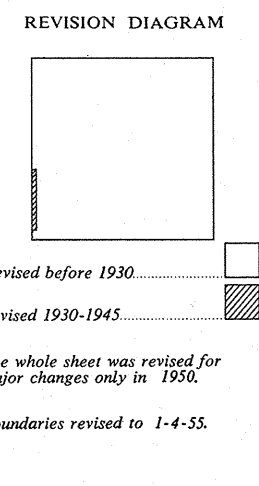

EXAMPLE Lower Road Wood Farm

The Grid Letters on this sheet are SD

| | | | |
|---|---------------------------|--|----------------------------|
| NORTH | | EAST | |
| Take west edge of kilometre square in which point lies and read the large figures printed opposite this line on north or south margins. | Estimate tenths Eastwards | Take south edge of kilometre square in which point lies and read the large figures printed opposite this line on east or west margins. | Estimate tenths Northwards |
| 75 | 6 | 35 | 354 |
| Full 100 Metre Reference SD 756354 | | | |

The above Full Reference is unique. For many purposes the first grid letter can be omitted, giving a reference, D 756354 which recurs at intervals of 500 Kilometres. If both grid letters are omitted, the reading reference 756354 recurs at intervals of 100 Kilometres. When the area concerned is sufficiently restricted, as will usually be the case with maps on scales of one inch to the mile and larger, both the grid letters are normally omitted.

At the Eastern edge of this sheet True North is 0° 15' East of Grid North and at the Western edge 0° 18' East of Grid North. Magnetic North was about 94° West of Grid North in 1956 decreasing by about 1" in four years. Heights are in feet above Mean Sea Level at Newlyn.

Printed and Published by the Director General of the ORDNANCE SURVEY, CHESHINGTON, SURREY, 1956.
