**REFERENCE**  
For fuller information see Reference Card published separately.

**NATIONAL GRID REFERENCE**  
The lines on the plan form part of the National Grid and are spaced at 100 metre intervals.  
To give a large scale reference defining the position of a point to the nearest 10 metres proceed as follows:—

EXAMPLE: G in Gindles Farm

EASTING	NORTHING
Take west edge of square in which point lies and read the figures opposite this line on NORTH and SOUTH margins	Take south edge of square in which point lies and read the figures opposite this line on EAST and WEST margins
813	144
8130	1443

TEN METRE REFERENCE: SD81391443

For further information see "The Projection for Ordnance Survey Maps and Plans and the National Reference System".  
The representation on this plan of a road, track or footpath is no evidence of the existence of a right of way.  
I figure such on this plan represents 90% of an acre on the ground.  
The alignment of tunnels where shown is approximate.
