 The altitudes of bench marks and surface heights are given in feet above the mean level of the sea at Newlyn, and are based on the revised primary levelling of 1912-21.
 Altitudes indicated thus (B.M. 547) refer to bench marks on buildings, walls, &c., those marked (s) preceded or followed by the height to surface level.
 Note.—To convert Decimal parts of an Acre into Rods and Perches, multiply by 4, this will give Rods and Decimals of a Rod.
 Example.—.357 = 1 Rod 17-120 Perches
