

Just like the English and Maths subscription, this premium content offers a wide range of vibrant ideas and resources which support the planning, teaching, learning and assessment of these important subjects within the primary school.

There are also invaluable tools for Subject and Senior Leaders to effectively monitor and evaluate provision. The resources are regularly updated to reflect current local and national developments in these key areas of the curriculum. This includes key learning and examining teaching and learning across most of the foundation curriculum, monitoring records, policy starters and audits, and much more!

Foundation subscriptions are for a 12-month period from the date of purchase. After your 12-month subscription ends, it will automatically renew for a further 12-month term. You will be notified via email prior to your-autorenewal.
