

SD 5470 - 5570 (1970) Publ.

Made and published by the Director General of the Ordnance Survey, Southampton. © Crown copyright, 1970.

COMPILED DATA

Levelled.....1953
Boundaries.....Jun 1969

1:12500 scale * 1:1250 scale (photographically reduced)
(a) Surveyed.
(b) Reconstructed from former County Series plans and revised.
(c) Fully revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.
HEIGHTS are given in METRES above the Newlyn Datum.
Bench Mark Lists which may contain later levelling information, also particulars of Bench Marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation on this plan of a road, track or path is evidence of the existence of a right of way.
The alignment of tunnels where shown is approximate.

BOUNDARIES

- England & Wales
County Boundary (geographical)
County & Civil Parish Boundary
Admin County or County Borough Boundary
London Borough Boundary
County District Boundaries based on civil parish
Civil Parish Boundary
Partly & Ward Boundaries based on civil parish
Partly & Ward Boundaries not based on civil parish
Where the boundary of an Admin Co., County Borough, or Civil Parish is coincident with that of a geographical county, the symbol for the latter is shown.
Scotland
County Boundary (geographical)
County Council Boundary
County of the City Boundary
County of the City Boundary
Burgh Boundary
District Council Boundary
Examples of Boundary Merittings

One grid square on this plan represents one hectare.

AREAS
Area measurement is to plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land the sanction of the Controller of H.M. Stationery Office and printed by the Lancashire County Council 1970.
EXAMPLE: 1827ha 4.7 area in hectares
4.7 area in acres
When measuring a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurement of area.
Limit of area within which individual parcels are not shown.

NATIONAL GRID REFERENCE
The grid lines form part of the National Grid and are at 100 metre intervals. To give a reference defining the position of a point to within 10 metres proceed as follows:-
EASTING
Take west edge of 100 metre square in which point lies and read the figures opposite this line on the north or south margin.
NORTHING
Take south edge of 100 metre square in which point lies and read the figures opposite this line on the east or west margin.
Estimate tens of metres from grid line to the point.
EXAMPLE: B 102707
TEN METRE REFERENCE: SD 55267079
For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System.'
