

Health and safety at the site questionnaire

The Inspector will visit the site and will need to know what safety equipment and protective clothing to bring. The following questions indicate the type of information the Inspector will need about the site and any land or building that the Inspector will need to enter. Please supply any additional information on a separate sheet of paper.

1. Is the site uneven or does it present any other known risks? Is special footwear or any other Personal Protection Equipment required, and will this be supplied at the site?

It is possible to access the Order route from Sandyhall Lane via a wooden sleeper ditch crossing and a stile at point A on the Order plan. It is then possible to walk part of the Order route to be added A-E and route to be deleted A-B but beyond point E the route to be added is not accessible. Between point B and point D the route to be deleted is not walkable. From point G on Lightfoot Lane it is possible to view part of the Order route but it is not possible to walk along it. Parking is not easily available on Lightfoot Lane.

2. Is there any likelihood of exposure to pets or other animals which may present a risk to the safety of the Inspector?

None identified.

3. Is the site remote and/or can it be seen from other occupied buildings/property/public land/roadside?

The site is not remote but is located in an urban setting.

4. Does the site have a good mobile phone signal or is there easy access to a public telephone should the emergency services be required?

A good mobile signal is available.

5. Are there any areas that require specialist equipment or training for access – any confined spaces?

No

6. Are there any dangerous pieces of equipment or substances stored at the location?

None identified.

7. Is there any likelihood of exposure to chemicals, asbestos, radiation or are there any other risks, requiring the use of Personal Protection Equipment, which may affect the health & safety of the Inspector? (Asbestos is referred to directly as it was present in buildings built before it was banned in 1977).

None identified.

8. If there is any other relevant information which the Inspector should be aware of that is not covered in this questionnaire?

Recent additional development means that not much of the Order routes can be easily viewed on site.
