

(1971) Publ.
 SD 4456 & 4556

© Crown copyright 1971

Made and published by the Director General of the Ordnance Survey, Southampton.

Area measurement is to plan edge only. One grid square on this plan represents one hectare.

Area measurement in hectares (ha) and acres, is shown within each parcel of land. The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 8400 parcel number
1-807ha area in hectares
6-47 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area.

Limit of area within which individual parcels are not shown: 6-47

To convert hectares to acres multiply by 2-4705

To convert acres to hectares multiply by 0-4047

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a reference defining the position of a point to within 10 metres proceed as follows—

EXAMPLE: G in Glasson

EASTING		NORTHING	
Take west edge of 100-metre square in which point lies and read the figures opposite this line on the east or south margin. Estimate tens of metres from grid line to the point.		Take south edge of 100-metre square in which point lies and read the figures opposite this line on the north or west margin. Estimate tens of metres from grid line to the point.	
443	7	561	7
4437	5617	5617	4437

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System.'

VEGETATION CLASSIFICATION. Where space permits, tree and scrub symbols in woods are shown in groups of four, three, two or singly to indicate close, medium, open or scattered density of trees or scrub.
