THE NATIONAL GRID	
TO GIVE A GRID REFERENCE CORRECT TO 100 METRES	
EXAMPLE Green Hill House The Grid Letters on this sheet are SD	
EAST Take west edge of kilometre square in which point lies and read the large figures printed opposite this line on north or south margin. Estimate tenths Eastwards.	NORTH Take south edge of kilometre square in which point lies and read the large figures printed opposite this line on east or west margin. Estimate tenths Northwards.
89	45
892	451

The above Full Reference is unique. For many purposes the first grid letter can be omitted, giving a reference, D 892451 which recurs at intervals of 100 Kilometres. If both grid letters are omitted, the resulting reference 892451 recurs at intervals of 100 Kilometres. When the area concerned is sufficiently restricted, as will usually be the case with maps on scales of one inch to the mile and larger, both the grid letters are normally omitted.

At the Eastern edge of this sheet True North is 0° 7' East of Grid North and at the Western edge 0° 11' East of Grid North.

Magnetic North was about 94° West of Grid North in 1956 decreasing by about 1° in four years.

Heights are in feet above Mean Sea Level at Newlyn.
